

MANY THANKS TO VOLUNTEER ELECTRIC

ROGER MARTIN, JOSH FINNEL AND TRAVIS KOWANETZ
AND TO THE MCARC VOLUNTEERS
FOR THE NEW “NOPONE” ANTENNA INSTALLATION

Friday, June 24th, a group of MCARC volunteers met with VOLUNTEER ELECTRIC’s Roger Martin, Josh Finnel and Travis (T-Bone) Kowanetz to install the new 145.150-mhz repeater antenna at the “NoPone” site.

Among the volunteers representing MCARC were Club President – Darris Goforth, Treasurer – Mike Elkins (not pictured), former Repeater committee chairman – Dale Williams and club members Curtis Axley, Nathan Floyd and their associate Naquan Vincent.

These folks together with the skilled and professional assistance from Volunteer Electric’s team relocated the antenna to a greater height on the tower, giving the antenna a new “foot-print” across it’s coverage area.

MCARC is greatly appreciative of the assistance and help Volunteer Electric has provided through the years. The NoPone Repeater is of great value to amateurs radio operators in the west side of McMinn County and to amateurs in Meigs county as well.

It is with great thanks the McMinn County Amateur Radio Club says to all who participated in this community effort we appreciate Roger, Josh and Travis and of course all the others who volunteered that day.

We know the amateur radio community will enjoy and utilize this asset for many years to come.

If used, this should be approved and signed by someone from the club
